Lobby overview

Curved lounge, a warm neutral floor composition and coordinated walnut / champagne details.

Furniture and floor plan

Main entrance at the bottom. Reception to the right on arrival; bar at the rear.

LAYOUT KEY

Front right: reception

Centre: curved lounge

Rear right: lounge bar

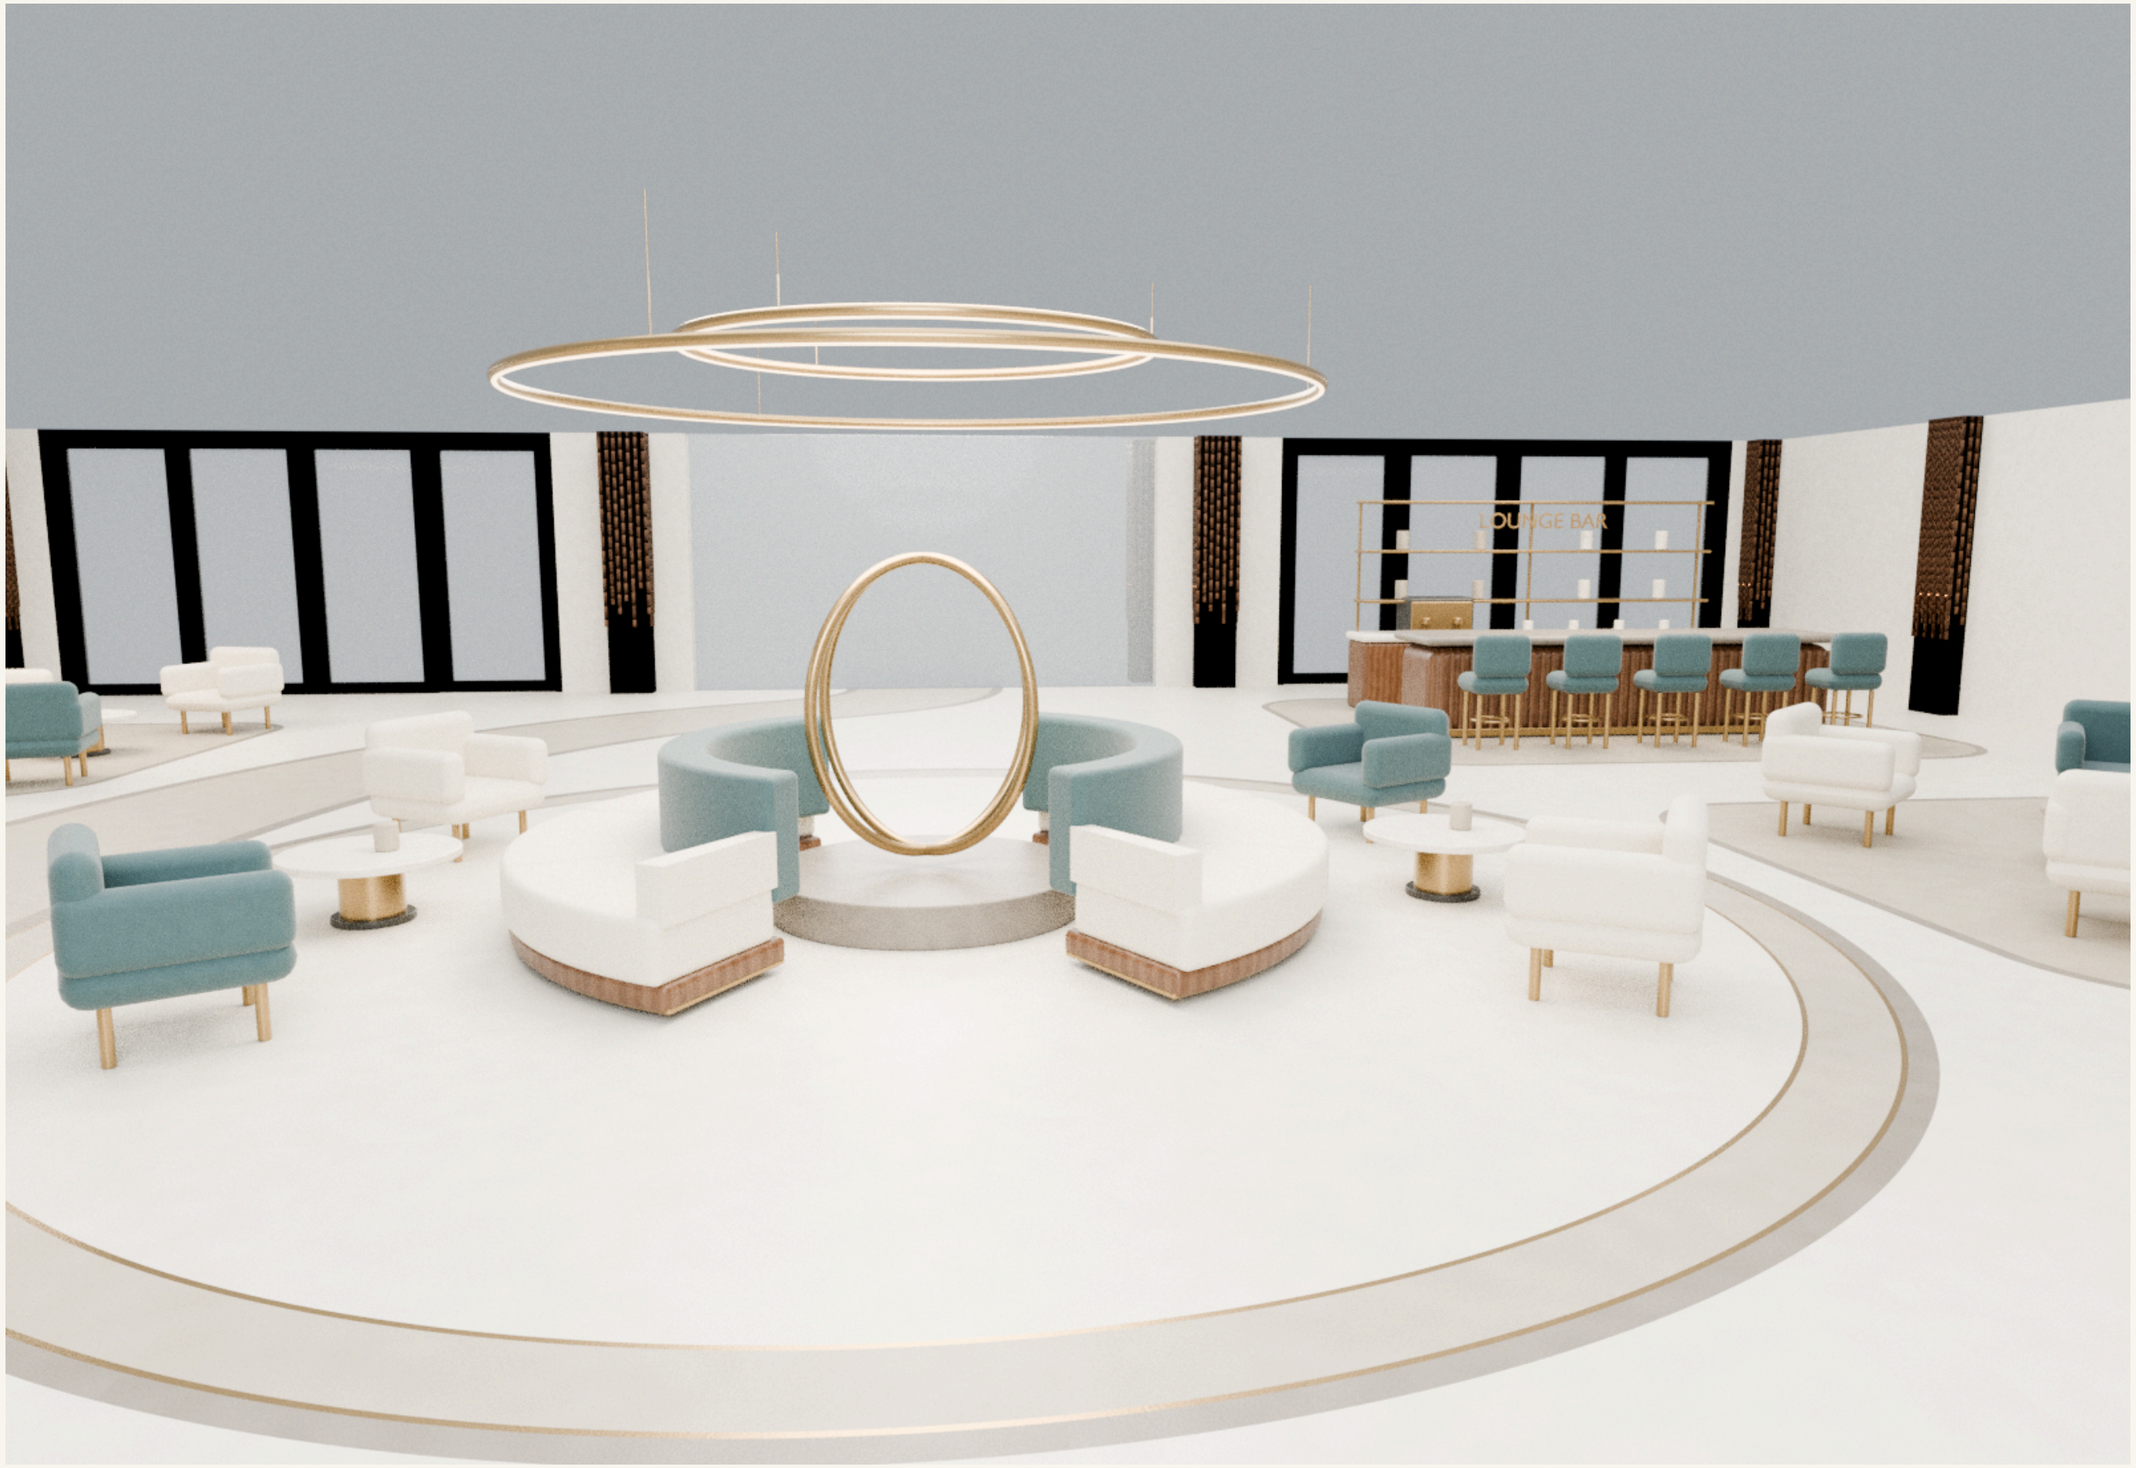

Left: two seating groups

Right centre: small lounge

Clear main route: 1.90 m

Arrival and central lounge

Ivory upholstery, petrol accents, sculptural bronze centrepiece and a circular pendant.

Reception

Stone counter with walnut fluting, a lowered service section and a freestanding backdrop.

Lounge bar

A stone-topped counter, five upholstered stools and an open walnut / champagne backbar.

Materials and finish coordination

Actual model textures. Furniture and floor fields share one restrained colour palette.

Ivory porcelain

Main floor and reception top

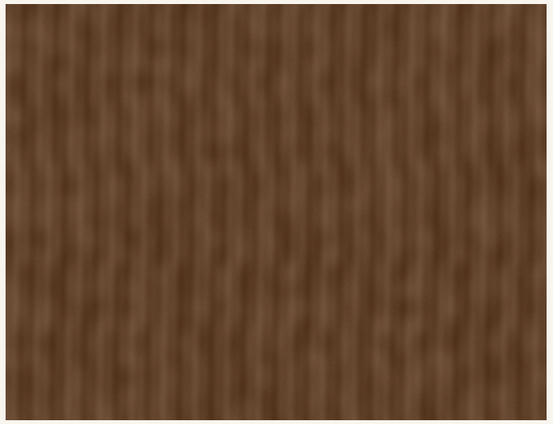

Warm greige stone

Floor zones and stone surfaces

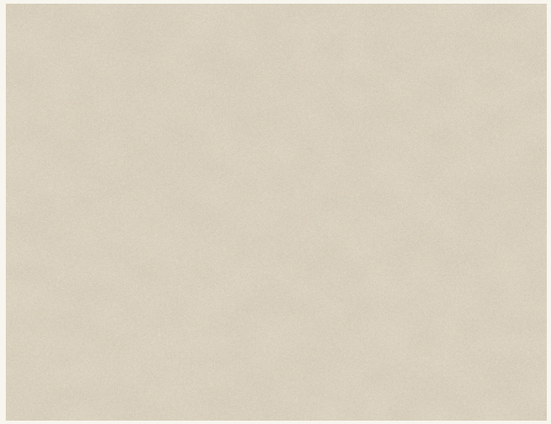

Taupe stone

Floor borders and accent fields

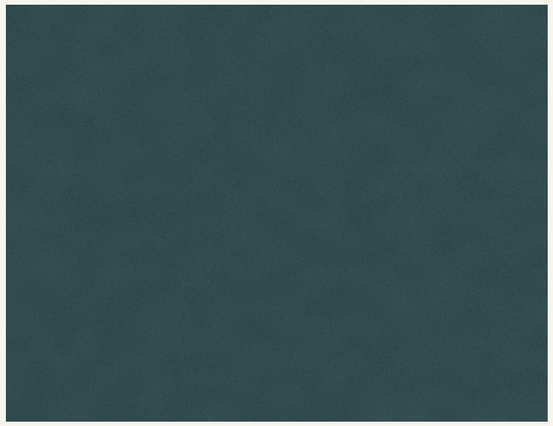

Walnut

Counters, joinery and wall fluting

Ivory upholstery

Curved lounge and sofas

Petrol upholstery

Accent chairs and bar stools

Champagne metal

Fine floor inlays and furniture

Warm plaster

Existing opaque wall surfaces

Model and delivery notes

Editable furniture, assigned material maps and a coordinated floor design on the supplied model.

33 named furniture groups; approximately 35 guest seats and 2 staff seats.

Reception is on the east/right side when entering the original central south entrance.

The original building shell, glazing, door openings and window openings are retained.

1,138 protected original meshes checked: no changed vertex positions or face sets.

The 1.90 m main circulation route and five opening buffer zones are clear in the layout checks.

Floor fields cover the existing footprint; former nonstructural planter voids are filled.

The DAE ZIP includes all material image maps; extract it before importing into SketchUp.

DAE geometry, hierarchy and texture links were independently reloaded and checked.

SketchUp Desktop was unavailable; native SKP export and desktop opening were not tested.

BLEND keeps replaced fixtures and remote source library geometry in hidden archive collections.

Cutaway images temporarily hide upper geometry for clarity; the editable model retains it.

This is an interior design model; it is not construction or building-services documentation.
